ABOUT THE PROGRAM

- Pharmacists play a vital role in devising chemical properties of various chemicals and create essential, life saving medicines. They conduct health and wellness screenings, carry out experiments in improving quality of existing drugs and vaccines in order to boost the success of medical sciences. Pharmacists. work relentlessly with healthcare professionals to maximise health outcomes.
- D.Y. Patil University School of Pharmacy is driven towards excellence. It inculcates a conducive environment and moulds pharmacists into quality scientists who rigorously carry out research and aid in creating quality drugs.
